

Project Development Phase Functional & Performance Testing Template

Date	15 July 2026
Team ID	
Project Name	UCab Premium – Cab Booking Application
Maximum Marks	4 Marks

Project team shall fill the following information in the functional and performance testing template for UCab Premium.

Test Scenarios & Results

Test Case ID	Scenario (What to test)	Test Steps (How to test)	Expected Result	Actual Result	Pass/Fail
FT-01	Email & Password Validation (Registration/Login)	Enter valid and invalid email/password combinations in the auth forms	Valid inputs accepted; clear errors for invalid inputs	Validation worked as expected	Pass
FT-02	Pickup/Drop Location Input Validation	Enter valid and empty/invalid location values when creating a booking	Accepts valid locations; shows error when fields are empty	Errors shown correctly for empty fields	Pass
FT-03	Booking Creation Flow	Provide complete pickup/drop details and click 'Book Ride'	Booking is created with status 'Pending' and fare estimate shown	Booking created and fare estimate displayed	Pass
FT-04	JWT Authentication & Role-Based Access	Check protected API routes with valid/invalid/missing tokens across roles	Valid role token grants access; invalid/missing token or wrong role is rejected	Access control enforced correctly on all routes	Pass
PT-01	Booking API Response Time	Use a timer to measure booking creation API response time	Should respond under 2 seconds	Average response time ~0.8 seconds	Pass
PT-02	Concurrent Booking Load Test	Send multiple simultaneous booking requests from different test accounts	API should not slow down or produce duplicate driver assignments	Handled correctly with locking; no duplicates observed	Pass
PT-03	PDF Receipt Generation Load Test	Trigger PDF receipt generation for multiple completed trips in quick succession	Should generate all receipts smoothly without crashing	All receipts generated without errors	Pass
PT-04	Analytics Dashboard Load Time	Load the admin analytics dashboard with a full dataset of bookings	Charts should render within 3 seconds	Dashboard rendered in ~1.5 seconds	Pass
