Project Name	UCab Premium – Cab Booking Application
Maximum Marks	4 Marks

Project Overview

Project Name: UCab Premium – Cab Booking Application

Project Description: A full-stack MERN cab booking system with role-based Rider, Driver, and Admin portals, JWT authentication, a five-stage booking lifecycle, transparent fare estimation, PDF receipt generation, and admin analytics dashboards.

Project Version: 1.0

Testing Period: 01 July 2026 to 10 July 2026

Testing Scope

- User registration, login, and JWT-based authentication for Rider, Driver, and Admin roles
- Ride booking creation, real-time status tracking, and cancellation
- Automated driver assignment and driver accept/reject workflow
- Fare estimation and PDF receipt generation on trip completion
- Rider rating and review submission
- Admin analytics dashboard and user management
- User Stories USN-1 through USN-15 from the Product Backlog

Testing Environment

URL/Location: <http://localhost:5173> (React frontend) with API at <http://localhost:5000>

Credentials: Test accounts provisioned for Rider, Driver, and Admin roles (e.g., rider.test@ucabpremium.com)

Test Cases

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	Rider registration with valid details	1. Open registration form 2. Enter valid email/password 3. Submit	Account created and confirmation email sent	Account created and confirmation email received	Pass
TC-002	Login with valid credentials	1. Open login page 2. Enter registered email/password 3. Submit	JWT token issued; redirected to role-based dashboard	Logged in successfully with role-based dashboard	Pass
TC-003	Login with invalid	1. Open login page 2.	Error message	Error message	Pass

	password	Enter valid email, wrong password 3. Submit	shown; access denied	displayed correctly	
TC-004	Create a new ride booking	1. Login as rider 2. Enter pickup/drop 3. Confirm booking	Booking created with status 'Pending'	Booking created with status 'Pending'	Pass
TC-005	Automated driver assignment	1. Create booking 2. Observe assignment	Nearest available driver assigned; status updates to 'Driver Assigned'	Driver assigned within expected time	Pass
TC-006	Driver accepts a ride	1. Login as driver 2. View assigned ride 3. Accept	Status updates to 'Accepted'	Status updated correctly	Pass
TC-007	Booking status progresses to completion	1. Driver updates status through trip stages	Status moves Accepted → On the Way → Completed	Status transitions worked as expected	Pass
TC-008	PDF receipt generation	1. Complete a trip 2. Open receipt option	PDF receipt downloads with correct fare details	PDF generated and downloaded successfully	Pass
TC-009	Rider submits rating and review	1. After trip completion 2. Submit star rating and comment	Rating saved and reflected on driver profile	Rating saved and visible on driver profile	Pass
TC-010	Admin views analytics dashboard	1. Login as admin 2. Open dashboard	Charts display total rides, revenue, and user growth	Charts rendered correctly with live data	Pass
TC-011	Unauthorized access to admin routes	1. Login as rider 2. Attempt to access admin API endpoint directly	Access denied (403 Forbidden)	Access correctly denied	Pass
TC-012	Cancel a booking with reason	1. Create booking 2. Cancel before completion 3. Enter reason	Booking status updates to 'Cancelled' with reason stored	Cancellation recorded correctly	Pass

Bug Tracking

Bug ID	Bug Description	Steps to Reproduce	Severity	Status	Additional Feedback
BG-001	Fare estimate briefly showed stale value after changing drop location	1. Enter pickup/drop 2. Change drop location 3. Observe fare estimate	Low	Closed	Fixed by re-triggering fare calculation on location change
BG-002	PDF receipt download button unresponsive on slow network	1. Complete trip on throttled network 2. Click download	Medium	Closed	Added loading state and retry handling
BG-003	Admin dashboard chart not refreshing after new booking	1. Create booking in another session 2. View admin dashboard	Low	Closed	Added periodic dashboard data refresh
BG-004	Duplicate driver assignment under rapid concurrent bookings	1. Submit multiple bookings simultaneously in the same area	High	Closed	Added assignment locking at the database level

Sign-off

Tester Name: UCab Premium QA Team

Date: 10 July 2026
