

Ideation Phase

Brainstorm & Idea Prioritization Template

Date	15 July 2026
Team ID	
Project Name	UCab Premium – Cab Booking Application
Maximum Marks	4 Marks

Step-1: Problem Statement

How might we help urban commuters book reliable, transparent, and affordable cab rides, while giving drivers a fair, organized, and efficient platform to manage their trips?

Step-2: Brainstormed Ideas

- Role-based portals for Rider, Driver, and Admin with separate dashboards
- Secure login and registration using JWT-based authentication
- Real-time booking status tracking (Pending, Assigned, Accepted, On the Way, Completed)
- Automated driver assignment based on availability and location
- Transparent fare estimation shown before booking confirmation
- PDF receipt generation for every completed ride
- Ride history and past trip records for riders and drivers
- Analytics dashboard for admin with charts on revenue, rides, and user growth
- Rating and review system after each completed ride
- Booking cancellation with reason tracking
- Email/OTP based account confirmation
- Responsive web interface accessible on mobile and desktop browsers

Step-2 (contd.): Grouping of Ideas

Theme	Grouped Ideas
Access & Security	Role-based portals, JWT authentication, OTP/Email confirmation
Booking & Transparency	Real-time status tracking, fare estimation, driver assignment, cancellation with reason
Trust & Feedback	Rating and review system, ride history, PDF receipts
Administration & Insights	Analytics dashboard, revenue and ride reporting

Step-3: Idea Prioritization (Importance vs Feasibility)

The team plotted brainstormed ideas on an Importance–Feasibility grid to decide what to build first.

Idea	Importance	Feasibility
Role-based portals (Rider/Driver/Admin)	High	High
JWT authentication & RBAC	High	High
Real-time booking status tracking	High	High
PDF receipt generation	Medium	High

Analytics dashboard (Recharts)	Medium	High
Rating & review system	Medium	Medium
OTP-based confirmation	Medium	Medium
In-app chat with driver	Low	Low
Scheduled/advance ride booking	Low	Low

Ideas in the High Importance / High Feasibility quadrant — role-based portals, JWT authentication, and real-time booking status tracking — were prioritized as the core of the UCab Premium MVP.
