Project Name	UCab Premium – Cab Booking Application
Maximum Marks	4 Marks

Empathy Map Canvas — Persona: Urban Commuter (Rider) booking a cab through UCab Premium.

Think & Feel

What really counts / worries & aspirations
Will the cab arrive on time? Is the fare fair? I want a hassle-free, predictable ride.

Hear

What friends, colleagues, and reviews say
Friends complain about drivers cancelling last minute; colleagues recommend apps with transparent pricing and live tracking.

See

Environment, friends, what the market offers
Crowded traffic, multiple competing cab apps, drivers taking phone calls to confirm rides manually.

Say & Do

Attitude in public, appearance, behavior towards others
Compares fares across apps before booking, calls the driver directly to confirm pickup, checks ride status repeatedly while waiting.

Pain

Fears, frustrations, obstacles
Unreliable ETAs, hidden charges, no visibility into driver assignment, difficulty reaching support after a bad experience.

Gain

Wants / needs, measures of success
Transparent upfront fare, real-time ride status, a trustworthy rated driver, and a digital receipt for every trip.
